

Irrigation Channels Subsidiary.

READ—

Government Order No. R. 1918-28—L. R. 261-22-116, dated 26th October 1923 directing that an experiment may be tried by including subsidiary irrigation channels in the maps of villages in which field work has to be undertaken and the result reported for orders.

2. Letter No. 48, dated 11th October 1924, from the Superintendent of Revenue Survey and Settlement in Mysore, stating that the experiment was made in some of the villages and that it is quite feasible to show the sub-irrigation channels in the village maps.

ORDER NO. R. 3067-77—L. S. 21-24-2, DATED 18TH NOVEMBER 1924.

The Survey Superintendent makes two suggestions in this connection:—

(i) that 'phot kharab' should be allowed afresh and assessment reduced accordingly for the area included in the bed of the channels;

(ii) that a rule should be made to the effect that only such sub-channels will be shown as are not disputed (at the time of field work) by the owners of lands through which it is proposed to show them, mutchalikas being taken as far as possible from the landholders concerned as in the case of foot-paths.

2. Government are pleased to approve of both the proposals.

K. V. ANANTARAMAN,

Secretary to Government,
Revenue Department.
